

The "Mini Scorpio EZ" is a new kind of remote head manufactured by Service Vision. Its high-torque "direct drive" motors are most silent and precise due to the abdication of gearing. This network-compatible system comes with another striking feature: with "Multi Head Control" several heads may be controlled with one control system by only one operator (see scheme). The modular equipment with two axis connected through bars allows it to be bigger or smaller in few seconds without using tools. Mini Scorpio EZ is suitable for TV- and film cameras, with an extension kit also for boxlens-cameras. This makes the system versatilely applicable for multi-purpose demands on site.

MINI SCORPIO EZ

NETWORK-COMPATIBLE 2-AXIS REMOTEHEAD,
SEVERAL HEADS CONTROLLABLE WITH ONLY ONE
CONTROL UNIT.
