

SCORPIO 38'

STATE OF THE ART VERSATILE
MOTION CAPTURE TELESCOPE CRANE

„Longer and Stronger“ ist the motto that describes the Scorpio 38' Telescope Crane the best. The brand new development made by Service Vision is a convincing improvement of the 30' + 7' Scorpio Crane, grown in all 4 telescopic sections with a shorter rear. Despite its size and robustness, this crane operates astonishingly quiet and smooth in both high and low speed. The new Electronic Box has a removable touch-panel display giving the possibility to the crane operator to place it as per his convenience. Additional features are e.g. programmable limits on the telescopic movement of the arm and the Movement Generator of the telescopic arm in relation to the horizontal or vertical movement.

TECHNICAL DETAILS

MAX. PAYLOAD	70 kg
MAX. LENGTH	11,58 m (38')
MIN. LENGTH	2,24 m
MAX. LENSE HEIGHT	12,19 m
