

With the Scorpio 45, Servicevision came up with something even bigger regarding the length. Besides its impressive lense height of 14 meters, the telescopic crane convinces with its additional features as for example the programmable movements of the telescopic arm and the limits of its range. Scorpio 45 moves remarkably smoothly and with a telescopic speed of up to 2,6 m/s it is an extremely dynamic system. The convenient Control Box displays all relevant data regarding range, lense height and the equivalent pan and tilt angle. A dynamic Counterweight-System warrants the perfect balance of the crane.

SCORPIO 45'

MOTION CAPTURE CAPABLE TELESCOPIC CRANE
WITH AN IMPRESSIVE LENSE HEIGHT

TECHNICAL DETAILS

MAX. PAYLOAD	70 kg
MAX. LENGTH	14 m (45')
MIN. LENGTH	2,26 m
MAX. LENSE HEIGHT	14,2 m
