

SHOTOVER G1

VERSATILE 3-AXIS GYRO-STABILIZED
REMOTEHEAD

The Shotover G1 is a lightweight and weather-resistant, 3-axis gyro-stabilized remotehead, combining unshakeable stability and excellent functionality within one system.

The latest generation of the remote controlled remotehead developed by ShotOver convinces with its unique stabilizing performance. Due to the design size, the remotehead is able to carry even bigger cameras. The 4K glas fiber abrasive wheel allows free 360° movements without any limits. This makes the Shotover G1 a perfect tool for camera cranes, rail tracking systems, cable systems, cars, boats etc.
